

GLS Romania launches Parcel Shop delivery: a new flexible and convenient option for senders and recipients

July, 2023

GLS Romania, one of the main providers of parcel services in our country, announces the launch of [Parcel Shops](#), a new delivery service designed to meet the needs of its customers.

Parcel Shops are locations where GLS customers can easily send and receive parcels. Whether delivering products purchased online or sending personal parcels, Parcel Shops are the quick gateway to GLS delivery service. This initiative gives GLS customers the opportunity to benefit from flexibility regarding the delivery schedule, as they decide when to pick up or drop off their parcels.

In order to reach as many consumers as possible, GLS aims to offer an extensive network of strategic locations throughout the country. Thanks to the partnership with PayPoint, the main operator of cash payments and electronic loading through retail points in the country, GLS offers its customers the benefits of the national fixed-point delivery, PayPoint Colet Expres. Thus, regardless of the geographical location of the recipient or the sender, they can now benefit from convenient and affordable delivery solutions. Currently, there are more than 2000 active Parcel Shops in Romania.

"Since we entered the Romanian parcel market, we have assumed the commitment to bring satisfaction to our customers and we have prioritized the quality of the services we offered them. As we understand the need for senders and recipients to have access to reliable, efficient and, perhaps most importantly, flexible delivery services, we have decided to introduce Parcel Shops and Lockers as intermediate points in the delivery processes. The launch of Parcel Shops, complementing the Lockers, is an important step in the continuous improvement of the delivery experience for all those who use our services." said Miklos Szoboszlay, General Manager of GLS General Logistics Systems Romania.

GLS Parcel Shop and GLS Locker represent modern delivery solutions and new services, which meet the current needs and requirements of the national and international parcel market.

Despre GLS Group

GLS Group is one of the largest independent parcel service providers in Europe, with a strong local presence in most countries on the continent. GLS Group also operates through wholly owned subsidiaries in Canada and the US West Coast, all included in a single GLS network. This facilitates the connection between communities and GLS customers delivering millions of parcels and stories every day. GLS is proactive in managing its network, constantly adapting to the ever-changing needs of the market. In 40 countries, the company prides itself on providing high-quality services that best meet the requirements of its customers. The GLS network consists of over 120 hubs and more than 1,600 warehouses, supported by approximately 37,000 delivery vehicles and 4,500 long-haul vehicles. These components ensure network resiliency, superior flexibility, and extensive development scope. In 2021/22, GLS generated record revenues of €5 billion and delivered 870 million parcels worldwide.
